The best evidence of a physician's success is the testimony of his patients. The increasing demands for my professional sevices prove that I have dealt homorably and fairly with hone who have consulted me. I never use a patient's name without permission, though I have many hundred certificates from those whom I have cured after they had been perconnect incurable. A thorough medical education, with many Years hospital experience and smillarity with therapetitic agents, a close observance of temperamental peculiarities and strict situation to brighten management, insures success, if cure is peeable, and I trankly give the patient my opinion.
